

The only wireless screen mirroring and digital signage tool designed for education.

CONTROL

Connect directly to your user database through LDAP and SAML, bulk configure and update, and **control emergency broadcasts** and digital signage. For one display in one room, or 10,000 displays across 10 campuses.

COLLABORATION

Create a **more dynamic learning space**, involve your students, and own your classroom. Vivi **works with literally every device** and display and it's ridiculously easy to use.

CREATIVITY

Students can share their work (with teacher permission), prompting immediate feedback where they benefit from **student-centric lessons** that are more **interactive** and **empowering**.
