

Supercharge your ChromeOS device management

Enhance deployment, onboarding, security, and IT support for your entire fleet of Chromebooks with **Chrome Education Upgrade**.

With Chromebooks, it's just one person on our IT management team, who with a click of a button makes something happen on every device in the district... that is just awesome."

Chicago Public Schools, US

Chrome Education Upgrade provides deeper management controls

Keep sensitive data safer

Easily manage security settings, create rules, and automate actions across your devices, apps, and accounts.

Manage devices at scale

As your school's needs change, adding or removing hardware and setting up student access to learning content is seamless.

Stay in control

Centralized settings in Google Admin console make it easy for you to monitor data and devices, investigate potential threats, and take action across your entire fleet.

One management solution for all ChromeOS devices

With Chrome Education Upgrade, you can manage any Chromebook or device that has ChromeOS Flex installed.

Centralized control center

The screenshot shows the Microsoft 365 Admin Center interface. The left sidebar contains navigation icons for Home, Users, Groups, Groups & mailboxes, Settings, Reports, and More. The main content area is titled "Search for users, groups or settings" and displays a grid of settings cards. The "Account settings" card is highlighted with a grey background. Other cards include Users, Product updates, Chrome Browser Cloud Management, Devices, Security, Directory sync, Data migration, App access control, Domains, Groups, Reporting, Roles, Storage, Billing, Alerts, Apps, Organizational units, Buildings and resources, Admin roles, and Support.

The screenshot shows the 'Settings' page for 'Users, groups or settings' in the Admin console. The 'Sign in settings' section is expanded, revealing several configuration options:

- Guest mode:** Currently set to 'Locally approved'. A dropdown arrow is visible.
- Sign in restrictions:** Currently set to 'Locally approved'. A dropdown arrow is visible.
- Family Link accounts:** Currently set to 'Inherited from Google default'. A dropdown arrow is visible.
- Autocomplete domain:** Currently set to 'Locally approved'. A dropdown arrow is visible.
- Sign in screen:** Currently set to 'Locally approved'. A dropdown arrow is visible.
- Device off hours:** Currently set to 'Inherited from Google default'. A dropdown arrow is visible.
- Device wallpaper image:** Currently set to 'Inherited from Google default'. A dropdown arrow is visible.

The 'Sign in settings' section also includes a note about enabling smart card login and a link to the 'Sign in settings page'.
