POLICY SUPPORT & CONSULTING

Develop Flexible, Framework-Based AI Policies

We help school districts develop flexible, framework-based policies that promote AI literacy and prepare students for the future workforce. We offer three comprehensive packages to help you navigate legal and ethical considerations, including compliance with FERPA and COPPA, and establish robust ethical guardrails.

Digital AI Policy Toolkit (Self-Paced):

A low-cost, flexible solution to meet compliance requirements. This toolkit includes a customizable policy draft, a pre-made stakeholder workshop template, and an on-demand learning series on AI ethics and policy foundations.

AI Policy + Consulting Series (Hybrid Support):

This package combines the digital toolkit with live virtual workshops and personalized consultation to help your district build a locally adapted, board-ready AI policy with stakeholder buy-in.

Comprehensive AI Policy + Training (Full-Service):

The ultimate solution for full adoption and integration of AI. This package includes everything from the other two packages, plus on-site training for educators, student workshops on digital citizenship and AI safety, and curriculum integration coaching.

All schools will receive certificates of completion for PD credit. By the end of this program, your district will have a ready-to-customize AI policy draft and staff trained to implement AI safely and responsibly.

Service Breakdown

Digital AI Policy Toolkit (Self-Paced):

Best for schools seeking a low-cost, flexible path to compliance.

The AI Policy Toolkit provides customizable policy templates aligned with FERPA, COPPA, and PPRA. The Training features an on-demand series covering AI 101 and ethics to establish a baseline of knowledge. The Support includes a best-practices playbook to ensure your team is informed and prepared for safe, immediate classroom use.

AI Policy + Consulting Series (Hybrid Support):

Best for schools needing expert support to finalize and vet their AI strategy.

The AI Policy & Consulting Series adds a leadership briefing highlighting compliance risks and strategic recommendations. The Training includes two live virtual workshops focused on the practical application of policy and ethics. The Support provides four hours of one-on-one consultation to deliver a fully vetted AI policy with total stakeholder buy-in.

Comprehensive AI Policy + Training (Full-Service):

Best for districts committed to full-scale AI integration and sustainable culture.

Our comprehensive offering establishes a comprehensive framework for district-wide use, including student-focused digital citizenship and safety materials. The Training delivers high-impact on-site workshops for up to 30 participants and dedicated student sessions. The Support offers ongoing curriculum coaching and follow-up consultations to ensure long-term, responsible AI use across the district.
