# GOOGLE TECHNICAL SERVICES

## Customized Google Workspace for Education Solutions

### ASSESS YOUR GOOGLE SETTINGS

Do you know if your Google Workspace console is optimized for safety and efficiency? Our experts collaborate with your team to assess and review current user settings, core services like Gmail, Drive, Calendar, and Classroom, as well as email flow and anti-spam settings. Our unique dashboard highlights areas needing improvement and confirms which settings are effective.

### GOOGLE VOICE

Google Voice is a great compliment to any Google Workspace environment for schools looking at a communication refresh. Teachers and administrators can call or text students and parents using their own devices while keeping personal numbers private. With Google Voice, you control your availability, directing calls and texts to voicemail when needed. Plus, all voicemails are fully transcribed for easy review.

### GOOGLE ADMIN CONSOLE

This customized service includes an information-gathering meeting where we learn about the needs of your district, documentation to be used as a reference for the settings, and a virtual hand-off meeting where we talk through everything to ensure your team is confident moving forward.

### GOOGLE CLOUD

If your district has been considering moving from internal servers to cloud-based data storage, look no further! Our Google Certified Cloud Professionals will assess your current system and workloads and ultimately help your team migrate its data center to the Google Cloud Platform.

### GOOGLE WORKSPACE COACHING

Are you looking to enhance your staff's proficiency with Google Workspace? We cover essential topics such as email settings, user management, migration backup, security, and more. Our training ensures you are proficient in using Google Workspace and the admin console, enhancing your district's efficiency and security.
